

The following provides a collection of relevant publications regarding Artificial Intelligence (AI) in capital markets and financial services at both the global and jurisdictional level. Previous versions are posted to the [newsletter's page](#) on the GFMA website.

September 2026

GFMA, AFME, ASIFMA, and SIFMA

[AFME Hosting OPTIC 2026 Conference in London \(October 19-20, 2026\)](#)

AFME is hosting its OPTIC 2026 in London on 19-20 October. This conference brings together the industry's leading voices to discuss the future of operations and post trade, and the role of technology in driving the transformation of Europe's capital markets. Further event details and registration are available [here](#).

[SIFMA Provides Comments on Colorado's Proposed Automated Decision-Making Technology and Conversational AI Service Rules \(September 3, 2026\)](#)

SIFMA provided comments to the Colorado Department of Law on its proposed Automated Decision-Making Technology and Conversational Artificial Intelligence Service Rules, 4 CCR 904-6, filed with the Secretary of State on August 11, 2026, to implement the Automated Decision-Making Technology in Consequential Decisions Act, SB 26-189, and the Conversational Artificial Intelligence Services Act, HB 26-1263. Further details are available [here](#).

GLOBAL

[BCBS Chair Discusses AI in Speech on Strong and Modern Supervision in a Fast-moving World \(September 30, 2026\)](#)

Erik Thedéen, Chair of the Basel Committee on Banking Supervision (BCBS), delivered a speech on "Strong and modern supervision in a fast-moving world." In the remarks, he noted that "risks themselves are also becoming more difficult to assess" and an example is that "AI can improve efficiency and decision-making, but it can also create new vulnerabilities around data quality, model risk, explainability, cyber security and accountability."

[IOSCO Highlights Efforts on AI and New Technologies as Part of 2025 Annual Report \(September 28, 2026\)](#)

The International Organization of Securities Commissions (IOSCO) published their "Annual Report 2025." The report includes details on digital assets and new technologies and highlights that "through its dedicated Fintech Task Force, IOSCO progressed the implementation of its recommendations for crypto and digital asset markets and advanced policy work on artificial intelligence (AI) and tokenization."

FSB RCG Americas Discusses Implications of AI (September 24-25, 2026)

The Financial Stability Board (FSB) Regional Consultative Group for the Americas (RCG Americas) discussed “the implications of artificial intelligence (AI) and quantum computing for operational resilience and cybersecurity in the financial sector” during their 24-25 September meeting in Mexico City.

BIS FSI Chair Delivers Speech on Supervising Banks in an AI-shaped Economy (September 18, 2026)

Fernando Restoy, Chair of the Bank for International Settlements (BIS) Financial Stability Institute (FSI), delivered a speech on “Supervising banks in an AI-shaped economy” at a conference on “Digital regulation in the era of agentic AI.” The full speech is available [here](#).

BIS General Manager Discusses the Global Economic Outlook, AI, and Innovation (September 11, 2026)

Pablo Hernández de Cos, General Manager of the Bank for International Settlements (BIS), discussed the “Global economic outlook, AI and innovation” in an interview with India’s Economic Times. Interview details are available on the BIS [website](#).

Pablo Hernández de Cos Discusses AI Growth and Financial Stability (September 10, 2026)

Pablo Hernández de Cos, General Manager of the Bank for International Settlements (BIS), delivered a speech on “Artificial intelligence, growth and financial stability: challenges for central banks” at the “Global Fintech Fest 2026” in Mumbai, India. Text of the speech is available [here](#).

EUROPE

United Kingdom

Andrew Bailey Publishes Article on Frontier AI and the Question of Governance (September 30, 2026)

Andrew Bailey, Governor of the Bank of England (BoE), published an article titled “Frontier AI and the question of governance.” The article notes that “to realise the benefits of artificial intelligence but also mitigate any risks, humans must retain the ability to intervene and set boundaries.”

FPC Highlights Risks Relating to AI During Latest Meeting (September 30, 2026)

The Financial Policy Committee (FPC) published the record of their 25 September meeting. The record highlights discussion regarding frontier AI and notes that “rapid advances in AI capabilities have increased cyber and operational risks.”

UK Parliament Joint Committee on Human Rights Publishes Report on Human Rights and the Regulation of AI (September 14, 2026)

The UK Parliament’s Joint Committee on Human Rights published a report titled “Human Rights and the Regulation of AI.” The report calls “on the government to take immediate action” and that “it must bring in a dedicated AI Bill, and set up a new regulator, to create tailored, effective protection for human rights in the UK.”
